

TECHNICAL TASK SPECIFICATION FORM v1.0

Project	qASA-Hefty	Document No	TTS-26-010601
Module	Accounting – Receivable Aging of Accounts	Document Date	May 19, 2026
Priority	High	Target Date	June 03, 2026
Reference Doc	HEFTY WOF-26-0127.pdf WOF-26-0127 #5	Assigned To	Jinuelroy Eule
		Prepared By	Erica Dane Gutierrez

I. Core Goal

Give users the ability to click on the Accounts Receivable (AR) Aging Report to see exactly which transactions make up those numbers, and let them export that detailed list.

II. Specifications

A. How It Works (The Business Logic)

Build two specific click interactions on the main AR Aging Report grid:

- **Clicking a Customer's Row:** Displays **all** "Verified" transactions for that specific customer.
- **Clicking a Specific Aging Cell (e.g., "61-90 Days"):** Displays **only** the "Verified" transactions for that customer that fall within that specific timeframe.

⚠ **Critical Rule:** Only transactions with a status of "**Verified**" should show up. Any transactions marked as "Posted" or "Draft" must be hidden.

B. What the Pop-up Window (Modal) Needs to Look Like

When a user clicks, a pop-up window must appear with the following elements:

- **Header:** Displays the Customer Name and the specific Aging Bucket selected (if they clicked a specific time cell).
- **The Main Grid:** A clean table showing these columns: **Date, AR No, Invoice No, WAC No, Description, Net Amount, and Aging Bucket.**
- **Footer:** Displays a calculated total sum of the "Net Amount" column. This total must exactly match the number the user clicked on the main report.
- **Export Controls:** Clear buttons with Excel and PDF icons placed in the bottom-right corner.

C. File Export Feature

Inside the pop-up window, users must be able to click an export button.

The system should instantly convert the exact list they are looking at into a downloadable **Excel** or **PDF** file.

TECHNICAL TASK SPECIFICATION FORM v1.0

III. PM Review / Developer Hand-off Checklist

- ☐ Does clicking a customer's row pull up all their verified transactions?
- ☐ Does clicking an aging cell (like 31-60 days) filter to only show that timeframe?
- ☐ Are "Draft" and "Posted" transactions completely excluded from the pop-up?
- ☐ Does the total sum at the bottom of the pop-up match the amount printed on the main report?
- ☐ Do the Excel and PDF files download successfully, and does the data inside match the screen perfectly?

IV. Acceptance Criteria (QA Checklist)

- ☐ Feature Accuracy: Filters correctly based on user interaction (Row vs. Cell click).
- ☐ Data Completeness: The pop-up correctly displays all required columns.
- ☐ Export Functionality: Clean, uncorrupted file generation for Excel and PDF.
- ☐ Data Alignment: The mandatory "Verified" filter is strictly applied so numbers match the main accounting books.
