

TECHNICAL TASK SPECIFICATION FORM v1.0

Project	qASA-Hefty	Document No	TTS-26-010602
Module	APV & AP Aging	Document Date	May 19, 2026
Priority	High	Target Date	June 03, 2026
Reference Doc	HEFTY WOF-26-0127.pdf	Assigned To	Jinuelroy Eule
	WOF-26-0127 #6	Prepared By	Erica Dane Gutierrez

I. Core Goal

Implement a clear 5-step status workflow for bills (APVs), updating report screens so "Paid" bills don't get mixed up with outstanding ones, and adding a pop-up window on the AP Aging Report so users can click on any Supplier to see and export exactly what is owed.

II. Specifications

A. The 5-Step AP Status Workflow & Editing Rules

Every Accounts Payable Voucher (APV) must follow this lifecycle. Permissions dictate who can edit at each stage:

- **Submitted (Draft):** The bill is entered. Anyone can edit.
- **Verified (Approved):** Checked and ready to be finalized. Only users with "Checker" access can edit.
- **Posted (Finalized):** Locked into the accounting books. Only "Admins" or "Superadmins" can modify.
- **Paid & Unposted (In Progress):** A Payment Voucher (PV) has been attached, but the actual payment isn't finalized in the general ledger yet. Locked for everyone—prevents paying the same bill twice.
- **Paid (Completed):** Fully paid and posted. This is the permanent final state. No edits allowed by anyone.

B. Screen & Report Filtering Rules

To keep accounting clean, screens must automatically filter out irrelevant data:

- **The AP Aging Report:** Must **strictly** show only transactions in the "**Verified**" state. Drafts, Posted (but unpaid), and Paid items must not appear here.
- **The "For Posting" Working List:** Any transaction marked as "**Paid**" or "**Paid & Unposted**" must immediately disappear from this worklist so users don't accidentally post or pay them again.

C. Supplier Drill-down Modal (Pop-up Window)

- **How to trigger:** A user clicks on a Supplier's row in the AP Aging Report.
- **What it displays:** A window showing only the "Verified" bills making up that Supplier's balance.
- **Header & Controls:** Display the Supplier Name, with clear **Excel and PDF export icons** sitting in the top-right corner.
- **Table Columns:** 1. Date 2. PV No (Payment Voucher Number) 3. Description 4. Due Date 5. Net Amount

TECHNICAL TASK SPECIFICATION FORM v1.0

- **Footer:** Displays the automatically calculated total sum of the "Net Amount" column. *(This total must match the supplier's balance shown on the main report).*

III. PM Review / Developer Hand-off Checklist

- ☐ **Workflow Control:** Can a standard user edit a Submitted bill but get blocked from editing a Verified one?
- ☐ **Admin Override:** Can only Admin/Superadmin accounts modify a Posted bill?
- ☐ **The "Double-Pay" Guard:** When you attach a Payment Voucher (PV) to a Verified bill, does its status change to "Paid & Unposted"?
- ☐ **Worklist Auto-Clean:** Do bills instantly disappear from the "For Posting" list the moment they are marked "Paid & Unposted" or "Paid"?
- ☐ **Pop-up Trigger:** Does clicking a Supplier row on the AP Aging Report open the modal successfully?
- ☐ **Column Alignment:** Does the pop-up table show exactly: Date, PV No, Description, Due Date, and Net Amount?
- ☐ **Dynamic Sum:** Does the sum at the bottom of the pop-up match the clicked supplier's total on the main report?

IV. Acceptance Criteria (QA Checklist)

- ☐ **Status Flow Integrity:** Transactions must move sequentially through the 5 states (Submitted → Verified → Posted / Paid & Unposted → Paid) without skipping steps or breaking permissions.
- ☐ **Data Separation:** The AP Aging Report calculations must only include "Verified" transactions.
- ☐ **Zero Duplicate Risks:** Under no circumstance can a "Paid" or "Paid & Unposted" transaction show up in the active posting list.
- ☐ **Visual Layout:** The export buttons (Excel & PDF) are positioned in the top-right of the modal, and the table contains all 5 required columns.
- ☐ **Export Precision:** Clicking the export buttons generates a clean, readable Excel or PDF download that matches the modal's data perfectly.
