

TECHNICAL TASK SPECIFICATION FORM v1.0

Project	qASA-Hefty	Document No	TTS-26-010701
Module	Closing of Books	Document Date	May 19, 2026
Priority	High	Target Date	June 18, 2026
Reference Doc	HEFTY WOF-26-0127.pdf	Assigned To	Jinuelroy Eule
	WOF-26-0127 #2	Prepared By	Erica Dane Gutierrez

I. Core Goal

To protect the integrity of the company's financial reports by allowing administrators to "lock" completed quarters. Once a quarter is locked, normal users are blocked from backdating or editing transactions within that timeframe, ensuring that quarterly reports remain finalized and accurate.

II. Specifications

A. The Quarterly Lock Rules

The fiscal year is split into four standard quarters:

- **Q1:** January 01 – March 31
- **Q2:** April 01 – June 30
- **Q3:** July 01 – September 30
- **Q4:** October 01 – December 31

When an administrator marks a quarter as "**Closed**":

- **No Retrospective Changes:** All users are blocked from creating, editing, or deleting ledger entries, invoices, and expenses with dates inside that closed quarter.
- **No Backdating:** Users cannot date a new transaction in the past if that date belongs to a locked quarter (e.g., they cannot record a February invoice while in May if Q1 is closed).

B. Admin Override & Unlock Workflow

To fix mistakes in past closed periods, a temporary override is available:

- **Admin-Only Privilege:** Only users with the Admin role can toggle a closed quarter back to "Open" (unlocked).
- **Mandatory Justification:** When unlocking, the Admin must type a reason in a mandatory "Reason for Reopening" text field. The system will log this reason alongside who did it and when.
- **Auto-Relock Guard:** To ensure periods are not accidentally left open indefinitely, the system should automatically lock the period again after 24 hours (unless manually locked sooner or extended).

TECHNICAL TASK SPECIFICATION FORM v1.0

C. Screens & User Experience (UI)

- **Status Dashboard:** A clean, easy-to-read dashboard grid displaying all four quarters and their current status: **Open** (in Green) or **Closed** (in Red).
- **The Lock Switch:** Admins will lock/unlock quarters using a simple toggle switch. Clicking the switch must trigger a confirmation popup (e.g., "Are you sure you want to lock/unlock this period?") to prevent accidental actions.
- **Blocker Warnings:** If a user attempts to save or edit a transaction in a closed period, a warning message must pop up:
"This transaction belongs to a closed period [Quarter]. Please contact your Administrator to request a temporary unlock."
- **Report Protection:** Any Balance Sheet or Profit & Loss (P&L) reports generated for a locked quarter must display a **"Finalized"** watermark on screen and in downloads.

III. PM Review / Developer Hands-off Checklist

- ☐ **Standard User Lockout:** If logged in as a standard user, are you completely blocked from saving/updating/deleting transactions in a locked quarter?
- ☐ **Admin Exclusive Control:** Is the toggle switch hidden or disabled for anyone who is not an Admin?
- ☐ **Reason Tracking:** Does the system force the Admin to enter a justification when unlocking a quarter, and does this save to an audit log?
- ☐ **Dashboard Color Coding:** Do quarters show up clearly with green (Open) and red (Closed) indicators on the dashboard?
- ☐ **Watermark Display:** If you run a report for a closed quarter, is the "Finalized" watermark visible on the screen and PDF outputs?
- ☐ **Accident Prevention:** Does the confirmation dialog pop up before an Admin can successfully lock/unlock a quarter?

IV. Acceptance Criteria (QA Checklist)

- ☐ **Locking Enforcement:** A standard user attempting to save a transaction dated March 15th while Q1 is locked must be blocked and shown the correct blocker warning.
- ☐ **Admin Reversal:** An Admin can successfully unlock Q1, type a reason, make a change to a March 15th transaction, and then manually lock it back up.
- ☐ **Log Verification:** Behind the scenes, the system correctly logs the exact timestamp, Admin's name, and their typed reason for every single unlock event.
- ☐ **No Overlap Setup:** During initial system configuration or setup, the system prevents setting up quarters with overlapping dates.
- ☐ **24-Hour Timer:** When a quarter is unlocked, it automatically reverts back to a "Closed" state exactly 24 hours later if the Admin does not close it manually first.
