

TECHNICAL TASK SPECIFICATION FORM v1.0

Project	qASA-Hefty	Document No	TTS-26-010603
Module	Check Register	Document Date	May 19, 2026
Priority	High	Target Date	May 22, 2026
Reference Doc	HEFTY WOF-26-0127.pdf	Assigned To	Jinuelroy Eule
	WOF-26-0127 #8	Prepared By	Erica Dane Gutierrez

I. Core Goal

To adjust and align the printed fields on our Check Register reports (using Crystal or RDLC) so that they print perfectly within the pre-printed layout of a physical RCBC check voucher. The objective is to ensure that the printed text lands exactly inside the boxes and lines on the actual physical check paper without any cutoffs or overlaps.

II. Specifications

A. The 4 Key Print Fields

The developer needs to precisely reposition the layout coordinates for the following four fields on the check report:

- **Date Field:** Must print perfectly centered within the designated **DATE** box on the physical check.
- **Payee Name:** Must align cleanly directly on top of the **"PAY TO THE ORDER OF"** line.
- **Amount in Words (Text Amount):** Must sit perfectly aligned on the pre-printed **"PESOS"** line.
- **Amount in Numbers (Numeric Amount):** Must print precisely inside the box preceded by the peso symbol (**₱**).

B. Visual Integrity Rules

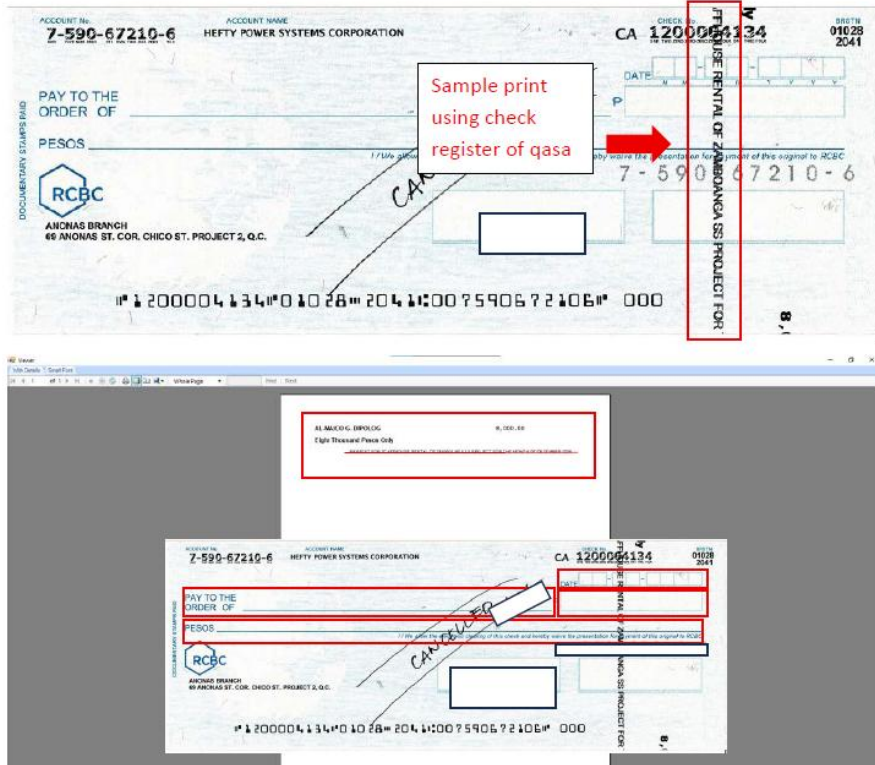

- **No Text Truncation:** Field boundaries must be wide enough so that long names or very large amounts are not cut off.
- **Appropriate Font Sizes:** The font family and size must look professional, fit nicely on the physical check, and avoid overlapping with any of the check's pre-printed text or borders.
- **No Data Source Changes:** This task is strictly a visual layout realignment. No calculations, backend databases, or underlying check register data sources should be modified.

C. System Print Preview (UI/UX)

- **High-Fidelity Preview:** The system's on-screen "Print Preview" must perfectly mimic the actual layout of the physical check, allowing users to accurately inspect the alignment on-screen before committing to physical printing.

TECHNICAL TASK SPECIFICATION FORM v1.0

III. PM Review / Developer Hand-off Checklist

- ☐ **Exact Field Positioning:** Have all four primary fields (Date, Payee, Numeric Amount, Text Amount) been adjusted to their designated target lines/boxes?
- ☐ **Accurate Print Preview:** Does the on-screen print preview show exactly how the text will align on the check layout?
- ☐ **The "Overlay" Test:** Has the developer printed the report onto a blank sheet of paper and placed it over a physical RCBC check to verify pixel-perfect alignment?
- ☐ **Boundary Check (Long Names):** If you enter a long payee name (e.g., "HEFTY POWER SYSTEMS CORPORATION"), does it fit without wrapping awkwardly or bleeding off the side?
- ☐ **Boundary Check (Large Amounts):** Do large numeric values (e.g., "P1,250,000.00") and long text translations fit perfectly within their designated spaces?

TECHNICAL TASK SPECIFICATION FORM v1.0

IV. Acceptance Criteria (QA Checklist)

- ☐ **Physical Alignment:** The printed output aligns flawlessly with all fields on a physical RCBC check voucher.
- ☐ **Visual Accuracy:** The system print preview acts as a reliable representation of the physical printed layout.
- ☐ **Data Completeness:** No text fields, letters, or numbers are cut off or misaligned during a real print test.
- ☐ **Standard Formatting:** The check formats dates, numeric commas, and currency symbols correctly according to standard accounting standards.
